github.com/Shettyankith

Enthusiastic and skilled Frontend Developer with hands-on professional experience at **Code Matrix** specializing in **React.js, Next.js, JavaScript, TypeScript**. Experienced in building **dynamic, responsive, and scalable web applications** for real-world use cases, including enterprise dashboards and consumer-facing platforms. Strong exposure to **frontend testing using Playwright and React Testing Library (RTL)**, along with working knowledge of **Node.js, Express, and MongoDB**. Recognized for **problem-solving abilities, quick learning, and effective collaboration in fast-paced agile environments**.

SKILLS

Front-End Development: React.js, Next.js, JavaScript (ES6+), Typescript,, SCSS, Tailwind CSS, MUI, Bootstrap, React Query, GraphQL
Back-End Development: RESTful APIs, Node.js, MongoDB, SQL, SocketIO, TypeORM, Express, PostgreSQL
Testing Libraries: Manual testing, React Testing Library, Playwright
State Management: Zustand, Redux, Context API
Version Control: GitHub
Soft Skills: Collaboration, communication, problem-solving, attention to detail

WORK EXPERIENCE

Junior Frontend DeveloperFeb 2025 - Present

CODE MATRIX SOFTWARE LIMITEDRemote

- Contributing as a **Junior Frontend Developer** on **multiple live production projects**, including an enterprise-level college budget management dashboard for **Christ University** and a **travel booking platform**.
- Built frontend features from scratch based on **Figma designs**, ensuring **clean, responsive, and intuitive UI** using **React, TypeScript, Material UI (MUI), SCSS, Tailwind CSS, and Redux**.
- Developed a **Budget Dashboard** enabling staff to **create, approve, reject, hold budgets, raise queries, generate reports, and manage hierarchical budgets**, improving workflow efficiency and transparency.
- Currently working on a **Travel-by-Ride web application** featuring **user authentication, ride listing and joining, secure payments, OTP verification, and Google Maps integration**.
- Implemented **admin functionalities** to **create, edit, and delete rides**, ensuring **role-based access control** and secure user experiences.
- Integrated **RESTful APIs** to connect frontend components with backend services and collaborated closely with **UI/UX designers and backend developers** to align implementation with **business requirements**.
- Utilized **Redux and Context API** for efficient state management across complex application workflows.
- Addressed and resolved **QA-reported issues**, following clean code principles, best practices, and **Agile development** methodologies.
- Actively managed **Git repositories**, maintained a **clean commit history**, and contributed to **incremental feature delivery in fast-paced team environments**.
- Continuously learning and adopting modern frontend tools and testing practices to improve **performance, maintainability, and code quality**.

EDUCATION

Bachelor of Technology in Computer Science & EngineeringJan 2022 - Jan 2025

Srinivas University, Mangaluru, KarnatakaGPA: 9.12

PUCJun 2019 - Apr 2021

Shyamili PU CollegeGPA: 97.8%

PROJECTS

Travel-by-Ride Web Application (Company Project)Nov 2025 - Present

- Developing a **travel booking platform** allowing users to **register/login, view available rides, join rides, and complete secure payments**.
- Implemented **OTP verification** and **Google Maps integration** for improved **security and location accuracy**.
- Built **admin dashboards** to **create, edit, and delete rides**, ensuring smooth ride management.
- Integrated **REST APIs** using **TanstackQuery** and managed application state using **Redux**.
- Ensured **responsive design, clean code, and optimized user experience** across devices.

College Budget Management Dashboard (Company Project – Christ University)Feb 2025 - Oct 2025

- Developed a **role-based budget management system** enabling staff to **create, approve, reject, hold budgets, and raise queries**.
- Implemented **hierarchical budget creation** and **report generation** for higher-level approvals.
- Built **responsive UI components** from **Figma designs** using **React, TypeScript, Material UI (MUI), SCSS, and Redux**.
- Integrated **RESTful APIs** and ensured **secure, role-based access control**.
- Collaborated with **design, backend, and QA teams** to deliver a **scalable production-ready application**.
